

FOR COMPANIES HIRING IN TAMIL NADU

Post AI internships, free

Reach AI and Data Science students across Tamil Nadu. We check every listing with you before students see it, and they apply on your own page.

Where your internship appears

Its own page

With the role, city, duration, stipend in your words, and your application link. While it is open, it carries the job-posting data search engines read.

AI internships in Tamil Nadu

Listed on thetn.ai/internships and on the page for students, thetn.ai/students.

The Monday email

Students who signed up get a Monday email of the deadlines in the next 10 days, so a dated internship reaches them before it closes.

How it works

1. **Send it** at thetn.ai/internships/post: the role, city, duration, stipend, what the intern will do, and your application page.
2. **We check it** with you by email or phone, and open your application page.
3. **It goes live** once the editor approves it. A listing with a deadline hides itself after that date; tell us when a rolling one fills.

What you need

- A work email at your company.
- Your own page where students apply (your careers page, or a form you run).
- If you give a deadline, the same date printed on that page.

Our rules

- ✓ **Free for you, free for students.** We never charge a company to post, or a student to apply.
- ✓ **Stipends shown as you state them.** If you do not state one, the listing says so.
- ✓ **Real roles only.** No fee-charging "internships", no training courses sold as internships, no unpaid work dressed up as a contest.
- ✓ **Your page is the source.** Students apply there, so you keep your own process.
- ✓ **Student contact details stay private.** If a featured student team is open to internships, we pass on your message; we never hand over their details.

Not on the TN AI Map yet? The map at thetn.ai/map lists AI startups, companies and labs in Tamil Nadu. Tell us about your company at editor@thetn.ai; we check your own website before adding anyone, and listing is free.
