

STUDENTS, COLLEGES, COMMUNITIES AND COMPANIES

List your AI event, free

Every AI event in Tamil Nadu that has a public page with its date and venue can be listed on theTN.ai at no cost, checked by a person first.

What your event gets

Its own page

A permanent page with the date, venue, organiser, cost and your registration link.

Found by search

Event data in the format search engines read, a sitemap entry, and a notice to search engines the day it goes live.

Easy for AI assistants

A plain one-sentence summary at the top, and a place in our guide for AI tools and our open data.

In the AI calendar

By city, type and date, and in the calendar people subscribe to on their phone.

In the Monday email

"Open this week" lists the events starting in the next 10 days.

A social poster

Events sent through the form get a theTN.ai poster for Instagram and LinkedIn once listed.

How it works

1. **Send the form** at thetn.ai/events/submit, with the link to your event page.
2. **We check it** against your event page. The date and venue must be printed there.
3. **It goes live** once the editor approves it.
4. **Share your page** in posters, WhatsApp groups and social posts.

Hub badges for your attendees

For a listed event in Chennai, Coimbatore, Madurai, Trichy, Salem, Hosur or Tirunelveli, ask us for a six-letter check-in code. Show it at the event: students who enter it at thetn.ai/students/checkin collect that city's Hub badge.

The rules

- ✓ **Free, always.** We never take payment to list, rank or feature an event. Events are shown in date order.
- ✓ **About AI.** AI, data or a closely linked technology, in Tamil Nadu or online for people here.
- ✓ **A public page.** Your website, college site, or a page on Unstop, Devfolio, Luma or Meetup, showing the date and venue.
- ✓ **No sales pitches** presented as events.
- ✓ **18 or older** to send the form. A younger student can ask a teacher or club coordinator.

Send it at least a week ahead if you can. To change a listing, update your event page first, then email editor@thetn.ai.
